Marrakech/Tanger

Summary

First-year Master's student in Artificial Intelligence & Data Science at FST Tanger, with hands-on experience in full-stack development and end-to-end ML pipelines. Proven ability to deliver under pressure – 2nd place at WeCreate Hackathon (EMSI x AIESEC, Jan 2025). Passionate about building intelligent, impactful applications. Seeking a PFA internship to apply and grow my skills in AI and software development.

Experience

Stagiaire Developpeur Full-Stack Marrakech, Morocco
LANAI SARL - Tanger Med | Projet de Fin d'Etudes (PFE) 04/2025 - 06/2025

- Developed a full-stack incident management web application using Angular, Java Spring Boot, and MySQL
- Implemented role-based access control, incident workflows, and dynamic dashboards

2eme Place - Hackathon WeCreate Casablanca, Morocco
EMSI Casablanca x AIESEC Maroc 18-19 Janvier 2025

- Built a FinTech app for Moroccan SME financial management in 48h, delivering expense tracking and financial reporting

Projects

Smart Energy Monitor – IoT & AI System (Arduino · MQTT · Node-RED · ThingsBoard · Python)

- Built a real-time IoT energy monitoring system with sensors (ACS712/PZEM-004T) and MQTT data transmission
- Integrated AI models for energy consumption prediction and anomaly/waste detection via interactive dashboard

Phishing Detection System – RAG Pipeline (Python · LangChain · FAISS · Sentence-BERT · Mistral · Flask)

- Built a RAG-based NLP system to detect phishing emails/SMS with multi-level risk classification (low/medium/critical)
- Constructed a custom annotated dataset and integrated BM25 + semantic search retrieval pipeline

Amazon Reviews – Real-Time Sentiment Analysis (Kafka · Spark Streaming · PySpark MLlib · MongoDB · Docker)

- End-to-end Big Data pipeline for sentiment analysis of Amazon reviews with 85.72% accuracy
- Real-time streaming architecture with Kafka, Spark and a Flask dashboard (online & offline modes)

Artisanat Marocain – Deep Learning Classification (Python · CNN / Transfer Learning · Flask · React.js)

- Automatic classification and recognition of Moroccan craft products for cultural heritage valorization
- Trained a CNN model, exposed via Flask REST API, connected to a React.js frontend

ML Analytics – End-to-End ML Web App (Python · Flask · Scikit-learn · Pandas · React · Next.js · TypeScript · Tailwind CSS)

- Full ML web application: CSV/Excel upload, automated preprocessing, automatic problem-type detection (Classification / Regression / Clustering)
- Supports 10+ ML algorithms with automatic model comparison, visualizations and result export

Incident Management Web App (Angular · Java Spring Boot · MySQL)

- Full-stack app with role-based access control and dynamic dashboards, built during PFE at TANGERMED

FinTech App – Moroccan SME Management (React · Java Spring Boot)

- Financial management platform for Moroccan SMEs, built in 48h at WeCreate Hackathon (2nd place)

Education

Faculty of Sciences and Technologies Tangier Tangier, Morocco
Master's in Artificial Intelligence and Data Science 2025 - Present

Faculty of Sciences and Technologies Gueliz Marrakech, Morocco
Bachelor's Degree in Distributed Computer Systems (SIR) 2024 - 2025
DEUST MIPC – Mathematics, Computer Science, Physics & Chemistry 2021 - 2024

Lycée Elkindi Fkih Ben Salah, Morocco
Baccalaureat – Physical Science 2020 - 2021

Skills

- Machine Learning & Deep Learning** : Scikit-learn, TensorFlow, Keras, CNN, Transfer Learning
- Data Analysis & Visualization**: Pandas, NumPy, Matplotlib, Seaborn, PowerBI
- Data Engineering & Big Data Tools** : Spark, Kafka, Hadoop/HDFS, Airflow
- Databases & Cloud/Infrastructure Tools** : MySQL, SQL Server, MongoDB, UML
- Programming Languages** : Python, Java, C++, C
- Web Development** : React, Next.js, Angular, FastAPI, Flask, Spring Boot
- Internet of Things (IoT)** : Node-RED, Arduino, MQTT, Cisco Packet Tracer
- AI & Optimization** : Genetic Algorithms, Metaheuristics, Multi-Agent Systems, Data Mining, NLP
